

You've come too far to throw it all away

Protect your proteins

Amicon® Ultra:

Amicon® Ultra centrifugal devices have regenerated cellulose membranes, which offer tighter MWCO separations than do PES membranes, resulting in higher levels of protein recovery with minimal flow through losses.

Recovery of cytochrome c (12.5 kDa), Amicon Ultra 4 10 kDa versus competitive 10 kDa devices

Benefits

- Amicon Ultra with regenerated cellulose membranes offer higher recovery than the identical MWCO PES membranes
- Amicon Ultra centrifugals do not contain any sodium azide, which can interfere with downstream experiments

Product		Amicon® Ultra-0.5	Amicon® Ultra-2	Amicon® Ultra-4	Amicon® Ultra-15

With EMD Millipore's protein expression products

Novagen® Overnight Express™ Autoinduction Systems

Expression without IPTG Induction

Features & Benefits

- Effortless protein expression in E. coli without the need for monitoring or induction
- Convenient for routine expression of proteins in multiple cultures or for high-throughput parallel analysis
- High cell densities and protein expression levels

pET E. coli T7 Expression Vectors

The pET System is the most powerful system for the cloning and expression of recombinant proteins in E. coli. The pET System offers numerous pET vector types, different host strains, and many other companion products designed for efficient detection and purification of target proteins.
