### **Worry-free Weighing**

## Thanks to Intelligent Efficiency

#### StatusLight™ - Balance Ready

The StatusLight uses color to indicate intuitively the status of the balance. Green means ready, yellow is a warning and errors are shown with red. The clearly visible light communicates if the balance is ready for you to start your weighing task.

#### Eliminating Charge – Sample OK

The compact antistatic kit fixes onto the side of your balance to gently and effectively eliminate electrostatic charge without causing turbulence in the weighing chamber. Results are more accurate and cross-contamination is avoided.

#### **RFID Solutions**

SmartSample™ RFID tags enable secure transfer of titration sample information from your balance to your titrator. SmartScan™ checks test and calibration dates on tagged pipettes. The built-in application guides you through the pipette check process.

#### LabX – Processes Under Control

LabX laboratory software provides flexible SOP user guidance on the balance touchscreen. Automatic data handling, calculations and report generation eliminate transcription errors and assure full traceability.

# **Excellence XSE Analytical Balances**Exceptionally Hard-working

XSE Analytical Balances offer exceptional weighing performance and quality assurance features as well as excellent ergonomics. They are the perfect workhorse solution for a multitude of workplaces.

The innovative StatusLight takes the worry out of weighing. The clearly visible green light lets you know when it's safe to start — all tests are up-to-date and the balance is level and functioning correctly.

With a wide range of accessories available and multiple connectivity options, XSE balances open up a world of opportunities for different weighing applications.

Designed, engineered and manufactured in Switzerland for outstanding quality you can trust.

#### Accessories

#### **AntiStatic Kits**

Free-standing AntiStatic Kits remove electrostatic charge from samples and containers. Compact unit also available (attaches to the balance).

#### **ErgoClips**

Dose directly into your container. ErgoClips hold a range of different shaped vessels securely on your balance.

#### SmartSample™ RFID Tags

Transfer titration sample information securely from your balance to your titrator via the titration beaker.

#### SmartScan™

Check testing and calibration dates on RFID tagged pipettes. Record new test dates when you test using the balance application.

The robust P-50 series lab printers produce archival-quality printouts on paper as well as continuous and peel-off labels.
